

Power Lab 120

- 1 Volt meter to measure supply voltage.
- 2 Amp meter to measure machine current.
- 3 20 amp circuit breaker for over-current protection.
- 4 20 amp GFCI for ground fault detection.
- 5 Rugged 20 amp on / off switch.
- 6 Mounting slots to secure device to the wall.
- 7 Heavy-duty 14 ga. steel construction.

PRODUCT DESCRIPTION

The PowerLab 120 is a trouble-shooting tool used on 120V machines. It allows the technician to quickly evaluate machines by simply plugging them into the device while operating. This tool is ideal for machine repair centers, tool rental centers, and floor care professionals. The all steel construction means it will be a reliable tool whether placed on the work bench or used on the job site.

RECOMMENDED PRODUCTS

The FM Floor Maintainer is a corded floor care machine available in two widths, 17 inches (43 cm) and 20 inches (51 cm). Dual planetary drive system uses precision needle bearing and a rugged 1 hp motor with 1.25 service factor provides extra power for grinding, sanding and carpet cleaning as well as polishing and scrubbing.

The Super 7R is the most efficient wood floor edger in the industry. Designed for both power and durability, it has been the edger of choice for the pro contractor for over 50 years. Equipped with a quick release dust bag and the ability to attach directly to a vacuum, this edger continues to outpace the competition.
